

**Kasthuri Kannan**  
Associate Professor and Director  
<https://kannan-kasthuri.github.io/>

Departments of Translational Molecular Pathology & Neurosurgery      UT MD Anderson Cancer Center  
Visiting Associate Professor (honorary appointment)      National University of Singapore, Singapore

---

### Professional Interests

Data Science, Systems Biology, Computational Pathology, Bioinformatics

---

### Collaborations (representative)

1. Clinton Yam, Assistant Professor, UT MD Anderson Cancer Center.  
Immune Phenotype and Response to Neoadjuvant Therapy in Triple-Negative Breast Cancer. *Clin Cancer Research*. Jul. 2021.
  2. Dean Felsher, Professor, Stanford University.  
MYC and Twist1 cooperate to drive metastasis by eliciting crosstalk between cancer and innate immunity. *eLife*. Jan. 2020.
  3. Jason Huse, MD, PhD, Associate Professor & Director, MD Anderson Cancer Center.  
Atrx inactivation drives disease-defining phenotypes in glioma cells of origin through global epigenomic remodeling. *Nature Communications*. Mar. 2018.
  4. Matthias Karajannis, MD, MS, Chief, Pediatric Neuro-Oncology, MSKCC.  
Recurrent homozygous deletion of DROSHA and microduplication of PDE4DIP containing the ancestral DUF1220 domain in pineoblastoma. *Nature Communications*. July 2018.
  5. Matija Snuderl, MD, Director, Molecular Pathology, NYU.  
DNA methylation-based classification of human central nervous system tumors. *Nature*. Mar. 2018.
  6. Orrin Devinsky, MD, Director, Comprehensive Epilepsy Center, NYU.  
Cardiac Arrhythmia and Neuroexcitability Gene Mutations in resected brain tissue from patients with Sudden Unexpected Death in Epilepsy. *Nature Genomic Medicine*. Mar. 2018.
  7. Adriana Heguy, PhD, Assistant Dean, Division of Advanced Research Technologies, NYU.  
Why do mutant allele frequencies in oncogenes peak around .40 and rapidly decrease? *Letters in Biomathematics*. Sept. 2016.
- 

### Skills

Proficiency	Software
Data science, Machine learning	Python, R, Scripts(Perl/Bash), C++, spatstat
Bioinformatics, Image processing	Matlab, Samtools, GATK, Bioinformatics Tools
Mathematical modeling, Statistics	MySQL, Neo4j, MS Access
Algorithms, Programming	Unix, Linux variants, Windows (all versions)

---

### Education

Timeline	Degree	Institution
Aug. 2008	PhD Computer Science	Texas A&M University, College Station
Apr. 2002	MS Mathematics	Texas A&M University, College Station
Apr. 2000	MSc Mathematics	Indian Institute of Technology, Madras
Jun. 1998	BSc Mathematics	University of Madras, Chennai

---

## Publications/Preprints (blue - equal contribution/senior/last/first author)

- [27] Xiangjie Sun, Jie Zhai, Baohua Sun, Edwin Roger Parra, Mei Jiang, Wencai Ma, Jing Wang, Anthony Kang, **Kasthuri Kannan**, Renganayaki Pandurengan, Shanyu Zhang, Luisa Maren Solis Soto, Cara Haymaker, Maria Gabriela Raso, Julia Mendoza Perez, Aysegul Sahin, Ignacio Wistuba, Clinton Yam, Jennifer Litton, and Fei Yang. Effector memory cytotoxic CD3+/CD8+/CD45RO+ T cell predicts good survival with less risk to recurrence in triple-negative breast cancer. *Modern Pathology*. Nov. 2021. [PMID: 34839351]

## Invited Talks/Workshops/Interviews

CancerCon 2018. Chennai, India. Feb. 01-03, 2018  
Manipal Academy of Higher Education, Manipal, India. Feb. 06, 2018  
Institute of Mathematical Sciences, Chennai. India. Feb. 8, 2018, with honorarium  
MedGenome symposium. Foster City, CA. Mar. 20, 2018  
*Beer with a Scientist Sundays*, New York, NY. Apr. 01, 2018  
*Distinguished Lecture Series*, MD Anderson Cancer Center, Houston, TX. Apr. 19, 2018  
Sanford Burnham Prebys Medical Discovery Institute, San Diego, CA. May 29, 2018  
Credit Suisse, Raleigh, NC. Jul. 16-19, 2019 (corporate training for employees)  
Egenesis, Boston, MA. Jul. 29, 2019  
GeneWiz, Short Hills, NJ. Aug. 7, 2019  
University of Texas Health Science Center, San Antonio. Aug. 30, 2019  
Courant Institute of Mathematical Sciences, Manhattan, NY. Sept. 24, 2019  
Texas A&M University, Department of Mathematics, Oct. 25, 2021  
Joint Immuno-Oncology (IO) Session, NCI. Nov. 05. 2021

---

## Employment History

**Associate Professor (Translational Molecular Pathology, Neurosurgery)      Feb 2020 - present**  
**Director, Computational Pathology Program**  
University of Texas MD Anderson Cancer Center, Houston, TX

- a) Systems biology of gliomas - GLioma AnalySiS (GLASS) consortium studies. Building knowledge graph database framework integrating multiomics data for hypothesis generation using Neo4j.
- b) Directing Computational Pathology Program.
- c) Spatial point process modeling of cancer tissue images obtained using multiplex immunofluorescence technologies.

**Assistant Professor (Pathology)      Dec 2013 - Aug 2019**  
New York University Langone Health, New York. NY

- a) Directed insights through data science applied to Next Generation Sequencing data (see publications).
- b) Software and pipeline development.
- c) Statistical and mathematical modeling.
- d) Director - Data science and Machine learning courses.

**Research Associate/Fellow      Apr 2011 – Nov 2013**  
Memorial Sloan-Kettering Cancer Center, New York, NY

- a) Comprehensive genomic and epigenomic analysis of the impact of first-line therapy in the molecular evolution of malignant glioma. DNA and RNA extraction from tumor specimens.
- b) Examination and discovery of genetic diversity in low grade glioma such as astrocytoma and oligodendroglioma.

- c) Analysis of genomic sequencing data (mutation discovery, copy number alterations) in glioma, head and neck and thyroid neoplasms.
- d) Development of next generation sequencing pipelines and integrated study of array (gene expression, methylation, copy number) and genetic alterations (mutations and translocations) in cancers.

#### **Research Associate**

**Oct 2010 – Apr 2011**

Pennsylvania State University, State College, PA

- a) Responsible for the development of computational infrastructure for high throughput sequencing data from next-generation platforms [SOLiD and Illumina].
- b) Organized the existing data analysis pipeline (genome alignment, motif discovery to biological interpretation) and provided consultation to the researchers on core computational issues.
- c) Managed sequencing tasks at the Bioinformatics Consulting Center, Institute for Genomics, Proteomics and Bioinformatics.

#### **Research Specialist**

**Jan 2008 – Sep 2010**

Stowers Institute for Medical Research, Kansas City, MO

- a) Team leader for ChIP-seq data analysis project in the Stowers Microscopy Center.
  - Developed and implemented an analytical strategy (in particular, a deconvolution model) to predict protein-binding sites in ChIP-seq data.
- b) Implemented an automated data workflow to study the growth phases of budding *S. Cerevisiae* cells.
- c) Designed image processing algorithms and software's for tracking *C. Elegans* and *Drosophila* to:
  - study the foraging behavior of *C. Elegans* [please refer to *PLoS Genet.* publication].
  - analyze the mating behavior of *Drosophila* [please refer to *Cell* publication].
- d) Statistical analysis of Fluorescence Correlation Spectroscopy data, a method that characterizes proteins.
- e) Data analysis of point spread functions in widefield and confocal microscopes using R.
- f) Developed a dynamic web-site (PHP + MySQL) that would query and process yeast cell images.
- g) Responsible for high quality image acquisition and microscope maintenance in the institute.

#### **Research Intern**

**Jan 2007 – Dec 2007**

Knowledge Based Systems, Inc., College Station, TX

- a) Offered significant ideas for logistics management in Oklahoma Air Logistics Center through data mining.
- b) Proposed several cost and time saving measures from directed insights obtained via predictive modeling.
- c) Initiated business intelligence for aircraft movement operations at the Tinker Air Force Base.

#### **Teaching (Course Director)**

- a) Programming for Data Analysis: <https://kannan-kasthuri.github.io/pda.html>
- b) Methods in Quantitative Biology: <https://kannan-kasthuri.github.io/qmb.html>
- c) Machine Learning: [https://kannan-kasthuri.github.io/machine\\_learning.html](https://kannan-kasthuri.github.io/machine_learning.html)
