

Data Scientist (13 years)

Several successful collaborations

Active learner and listener
Emotional intelligence
Communication

Software development
Bioinformatics pipeline development
NGS analysis/processing

directed efforts

Proven track record of applying data science to biology and omics data
Image analysis/processing

Designing/directing data science & machine learning courses

creativity

Directed insights using data science

Mathematical & statistical modeling
Visualization

self-motivation

Data science (13 years)
Machine learning
Several bioinformatics tools
Implementation skills
R/Python/Other
Strong Unix skills
Image analysis
Statistics, Mathematics
Academic research
Top publications

Kasthuri Kannan

skills

Assistant Professor
New York University
Nov. 2013-Present

Research Fellow/Associate
Memorial Sloan-Kettering Cancer Center
Apr. 2011-Oct. 2013

Research Specialist/Associate
Stowers Institute for Medical Research/ Pennsylvania State University
Jan. 2008-Aug. 2010/Sep. 2010-Mar. 2011

work experience

Internship
Knowledge Based Systems, Inc.
Jan. 2007-Dec. 2007

acquired credentials

Doctor of Philosophy
Computer Science (PhD)
Texas A&M University
Aug. 2008

Master of Science
Mathematics (MS.)
Texas A&M University
Apr. 2002

education

Bachelor of Science
Mathematics (BSc.)
University of Madras
Apr. 1998

Master of Science
Mathematics (MSc.)
IIT, Madras
Apr. 2000

Address: 8-16 Susan Pl. Fair Lawn, NJ
Contact: 646 771 3500; kasthuri@gmail.com

Kasthuri Kannan

Assistant Professor, New York University
<https://kannan-kasthuri.github.io/>

TRB 745, 227 E30th St. New York. NY 10016

kasthuri.kannan@nyumc.org

Professional Interests

Data science, Machine learning and Bioinformatics.

Data Science Collaborations (representative)

1. Jason Huse, MD, PhD, Associate Professor & Director, MD Anderson Cancer Center.
Atrx inactivation drives disease-defining phenotypes in glioma cells of origin through global epigenomic remodeling. *Nature Communications*. Mar. 2018.
2. Matthias Karajannis, MD, MS, Chief, Pediatric Neuro-Oncology, MSKCC.
Recurrent homozygous deletion of DROSHA and microduplication of PDE4DIP containing the ancestral DUF1220 domain in pineoblastoma. *Nature Communications*. July 2018.
3. Matija Snuderl, MD, Director, Molecular Pathology, NYU.
DNA methylation-based classification of human central nervous system tumors. *Nature*. Mar. 2018.
4. Orrin Devinsky, MD, Director, Comprehensive Epilepsy Center, NYU.
Cardiac Arrhythmia and Neuroexcitability Gene Mutations in resected brain tissue from patients with Sudden Unexpected Death in Epilepsy. *Nature Genomic Medicine*. Mar. 2018.
5. Adriana Heguy, PhD, Assistant Dean, Division of Advanced Research Technologies, NYU.
Why do mutant allele frequencies in oncogenes peak around .40 and rapidly decrease? *Letters in Biomathematics*. Sept. 2016.

Skills & Education Summary

Proficiency		Software
Data science, Machine Learning		Python, R, Scripts(Perl/Bash), C++, spatstat
NGS analysis, Image processing		Matlab, Samtools, GATK, Bioinformatics Tools
Mathematical Modeling, Statistics		MySQL, PostgreSQL, MS Access
Algorithms, Programming		Unix, Linux variants, Windows (all versions)

Timeline	Degree	Institution
Aug. 2008	PhD Computer Science	Texas A&M University, College Station
Apr. 2002	MS Mathematics	Texas A&M University, College Station
Apr. 2000	MSc Mathematics	Indian Institute of Technology, Madras
Jun. 1998	BSc Mathematics	University of Madras, Chennai

Employment History

Assistant Professor (Pathology)

Dec 2013 - Present

New York University Langone Health

- a) Directed insights through data science applied to Next Generation Sequencing data (see publications)
- b) Software and pipeline development
- c) Statistical and mathematical modeling
- d) Director - Data science and Machine learning courses

Research Associate/Fellow

Apr 2011 – Nov 2013

Memorial Sloan-Kettering Cancer Center, New York

- a) Comprehensive genomic and epigenomic analysis of the impact of first-line therapy in the molecular evolution of malignant glioma. DNA and RNA extraction from tumor specimens.

- b) Examination and discovery of genetic diversity in low grade glioma such as astrocytoma and oligodendroglioma.
- c) Analysis of genomic sequencing data (mutation discovery, copy number alterations) in glioma, head and neck and thyroid neoplasms.
- d) Development of next generation sequencing pipelines and integrated study of array (gene expression, methylation, copy number) and genetic alterations (mutations and translocations) in cancers.

Research Associate

Oct 2010 – Apr 2011

Pennsylvania State University, State College

- a) Responsible for the development of computational infrastructure for high throughput sequencing data from next-generation platforms [SOLiD and Illumina].
- b) Organized the existing data analysis pipeline (genome alignment, motif discovery to biological interpretation) and provided consultation to the researchers on core computational issues.
- c) Managed sequencing tasks at the Bioinformatics Consulting Center, Institute for Genomics, Proteomics and Bioinformatics.

Research Specialist

Jan 2008 – Sep 2010

Stowers Institute for Medical Research, Kansas City

- a) Team leader for ChIP-seq data analysis project in the Stowers Microscopy Center.
 - Developed and implemented an analytical strategy (in particular, a deconvolution model) to predict protein-binding sites in ChIP-seq data.
- b) Implemented an automated data workflow to study the growth phases of budding *S. Cerevisiae* cells.
- c) Designed image processing algorithms and software's for tracking *C. Elegans* and *Drosophila* to:
 - study the foraging behavior of *C. Elegans* [please refer to *PLoS Genet.* publication].
 - analyze the mating behavior of *Drosophila* [please refer to *Cell* publication].
- d) Statistical analysis of Fluorescence Correlation Spectroscopy data, a method that characterizes proteins.
- e) Data analysis of point spread functions in widefield and confocal microscopes using R.
- f) Developed a dynamic web-site (PHP + MySQL) that would query and process yeast cell images.
- g) Responsible for high quality image acquisition and microscope maintenance in the institute.

Research Intern

Jan 2007 – Dec 2007

Knowledge Based Systems, Inc., College Station

- a) Offered significant ideas for logistics management in Oklahoma Air Logistics Center through data mining.
- b) Proposed several cost and time saving measures from directed insights obtained via predictive modeling.
- c) Initiated business intelligence for aircraft movement operations at the Tinker Air Force Base.

Teaching Initiatives (Course Director)

- a) Programming for Data Analysis: <https://kannan-kasthuri.github.io/pda.html>
- b) Methods in Quantitative Biology: <https://kannan-kasthuri.github.io/qmb.html>
- c) Machine Learning: https://kannan-kasthuri.github.io/machine_learning.html

Invited Talks

1. CancerCon 2018. Chennai, India. Feb. 01-03, 2018
 2. Manipal Academy of Higher Education, Manipal, India. Feb. 06, 2018
 3. Institute of Mathematical Sciences, Chennai. India. Feb. 8, 2018, with honorarium
 4. MedGenome symposium. Foster City, CA. Mar. 20, 2018
 5. *Beer with a Scientist Sundays*, New York, NY. Apr. 01, 2018
 6. *Distinguished Lecture Series*, MD Anderson Cancer Center, Houston, TX. Apr. 19, 2018
 7. Sanford Burnham Prebys Medical Discovery Institute, San Diego, CA. May 29, 2018
-
