

Programming for Data Analysis: Introduction

**Kasthuri Kannan, PhD.
Assistant Professor, Pathology
New York University**

Envisioned to empower

Not about R

Using R all the time

Not about programming

Program all the time

Not about big data, Hadoop, distributed comp. etc.

Do data science all the time

Not about machine learning, stat. inference etc.

Course on machine learning offered in Spring

Contents

Data science, a hype?

Why am I here?

Why data science?

Hopefully, there is no penalty drop-out date

Ok, so tell me what is data science?

I'll stay put if you don't kill us with equations

I HAVE NO IDEA
WHAT'S GOING
TO HAPPEN.

AND I LOVE IT.

What is this course about?

DATA SCIENCE, A HYPE?

A dense word cloud composed of numerous semi-transparent blue and white text elements. The words are arranged in a roughly circular pattern, with some overlap. Key visible words include 'DATA SCIENCE' in large letters at the bottom center, 'DATA' on the left, 'SCIENCE' on the right, 'INFORMATION' on the far left, 'SOCIAL NETWORKS' on the far right, and many other terms like 'COMPUTING', 'TECHNOLOGY', 'ALGORITHMS', 'PREDICTIVE', 'ANALYTICS', 'MACHINE LEARNING', 'WEB SERVICES', 'ENGINEERING', 'PLANNING', 'STATISTICS', 'TARGET', 'CONTENT', 'PROCESSING', 'CONTENT', 'CONSUMER', 'ORGANIZATION', 'EVENTS', 'PROGRAMMING', 'SOFTWARE', 'MODELS', 'E-MARKETING', 'COMMUNICATION', 'COMPUTER', 'MARKETS', 'WEB MARKETING', 'DATA MINING', 'VISION', 'ENGINEERING', 'RESEARCH', 'PROBABILITY', 'COMPUTING', 'KDD', 'STRATEGY', 'WORLDWIDE', 'VISUALIZATION', 'SERVICE', 'MOBILE', 'PRICING', 'CODING', 'SEGMENTATION', and 'SOCIAL'.

The outlook for data scientists: less hype, more hiring.

The exuberance surrounding big data has passed its peak and is trending down, the technology research firm Gartner declared last August in [its annual "hype cycle" report](#) on perceptions of technology.

Perhaps, but it remains a rising market for data scientists. Salaries rose 8 percent on average in the last year, with bonuses adding \$56,000, according to a salary and employment survey released on Tuesday by [Burtch Works](#), a recruiter of professionals with quantitative skills.

NSF Announces \$17.7 Million Funding for Data Science Projects

August 25, 2017 by staff [Leave a Comment](#) [Print](#)

The screenshot shows the NYU Data Science at NYU website. The header features the NYU logo and navigation links for About, What is data science?, Research, Academics, News, and Contact Us. Below the header is a large banner image of a brain scan. The main content area is titled "RESEARCH CENTERS IN THE FIELD OF DATA SCIENCE" and includes a section about the Center for Data Science (CDS). A large graphic on the right states "500k" with a subtext explaining that the world's 500,000+ data centers are large enough to fill 5,955 football fields.

RESEARCH CENTERS IN THE FIELD OF DATA SCIENCE

Center for Data Science (CDS)

The NYU Center for Data Science (CDS) is a focal point for New York University's university-wide initiative in data science. It was established to help advance NYU's goal of creating the country's leading data science training and research facilities, arming researchers and professionals with tools to harness the power of big data.

Big data will be focus of new UW research institute

By Erik Lorenzsonn Sep 2, 2017

PUBLIC RELEASE: 24-AUG-2017

Brown awarded \$1.5M to establish data science research institute

BROWN UNIVERSITY

Demand is likely to outpace supply

Demand in data science

At its core, data science involves using automated methods to analyze massive amounts of data and to extract knowledge from them. With such automated methods turning up everywhere from genomics to high-energy physics, data science is helping to create new branches of science, and influencing areas of social science and the humanities.

50X in 2020

The world will generate 50 times more data than was generated in 2011.

The U.S. alone is going to face a **shortage of 140,000 to 200,000 professionals with data science skills by 2018.**

Source: McKinsey Global Institute

The position of "data scientist" on the list of the 25 best jobs in America in 2016.

\$116,840
median salary in the US.

94%
of the US graduates have found jobs,
averaging **\$114,000** since 2011.

Over 2/3 believe demand for talent will outpace the supply of data scientists

OVER THE NEXT FIVE YEARS, DEMAND FOR DATA SCIENTISTS WILL:

Only 12% see today's BI professional as the best source for new data scientists

JOB GROWTH AND DEMAND

11%
PROJECTED GROWTH FROM 2014 TO 2024
7%
FASTER THAN GROWTH FOR ALL OCCUPATIONS

Extremely well-paid career

The average salary for Data Scientists is \$189K.★

WHY DATA SCIENCE?

Drastic reduction in storage costs

Technology = Reduction in storage cost

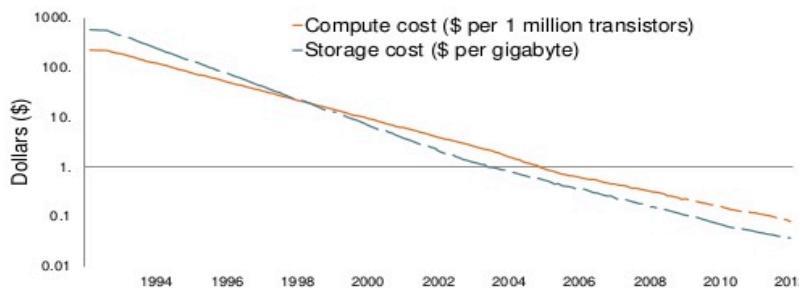

Drastic reduction in computation costs

Technology = Reduction in computing cost

Moore's law refers to an observation made by Intel co-founder Gordon Moore in 1965. He noticed that the number of transistors per square inch on integrated circuits had doubled every year since their invention. Moore's law predicted that this trend will tend to continue into the foreseeable future. It is almost ending now, though.

Moore's law: cost of storage, compute \Rightarrow zero

Storage cost-performance and computing cost-performance

ANDREESSEN HOROWITZ

Genome vs. genome analysis

Big data has immense value

Capitalizing on Big Data:

Strategies outperforming companies are taking to deliver results

Leaders are
166%
more likely to
make most decisions based on data

And they are
2.2x
more likely
to have **formal career path**
for analytics

75%
of Leaders cite
growth as the key source of value
from analytics

Leaders **measure the impact** of analytics investments

Leaders have **predictive analytics** capabilities

Leaders have some form of **shared analytics resources**

Raising expectations

Cognitive computing

People expect systems to behave like humans

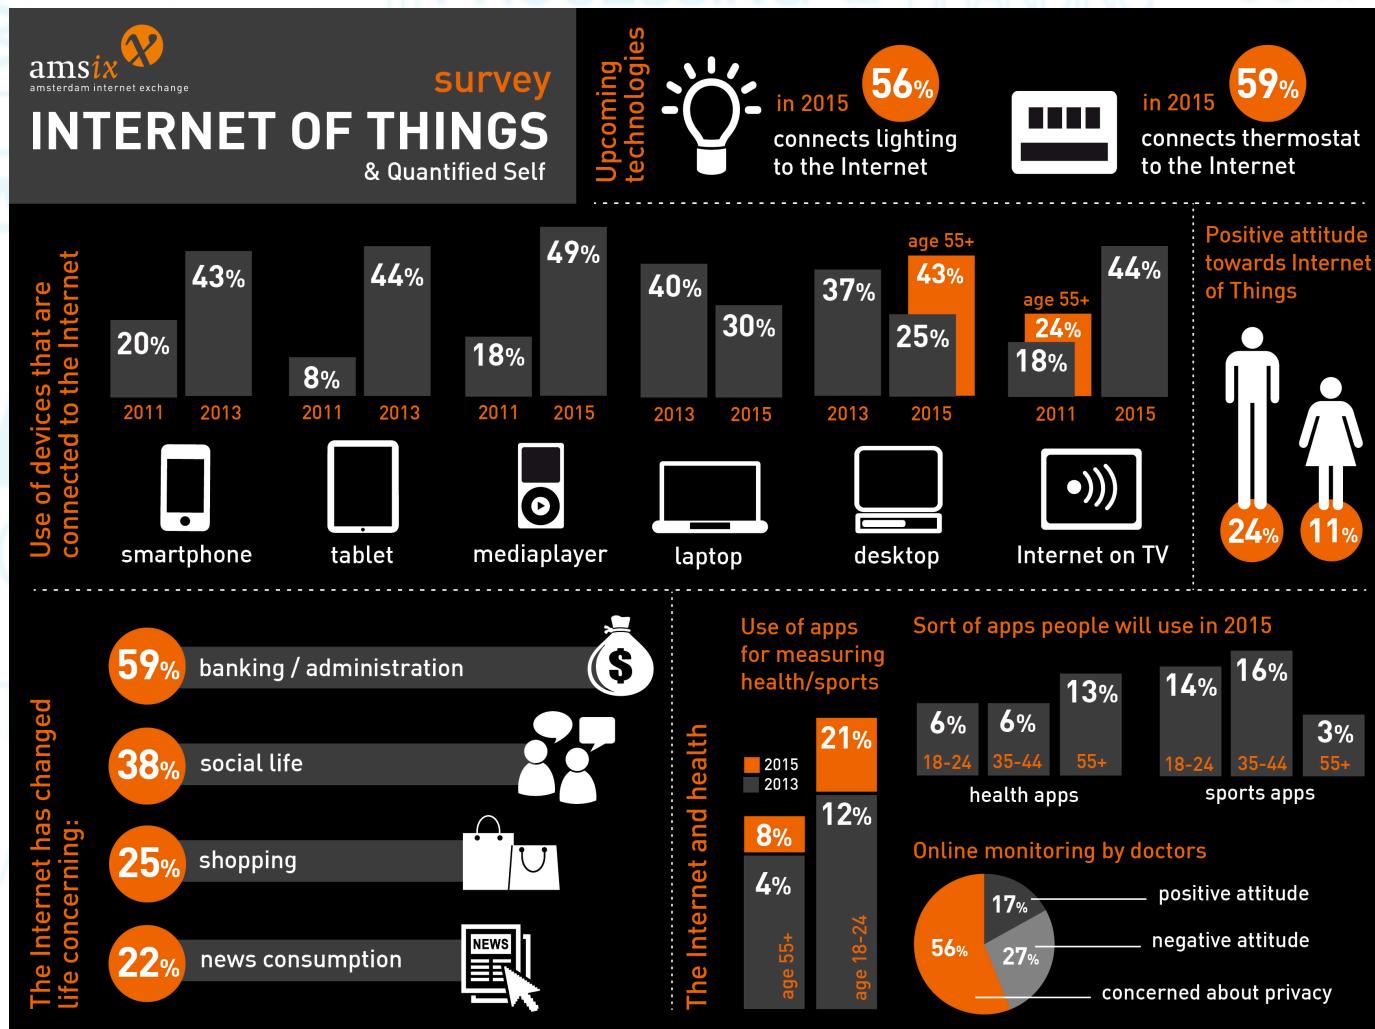

Adaptive (learning as the information changes)

Interactive (communicating with other humans/systems)

Contextual (understanding meanings, integrate other info)

Processing large datasets of differing types like text, voice, sensors and images.

Internet of Things: The next frontier

Internet of Things: Projection

MULTIMEDIA

Why biomedical data science?

THE INTERNET OF (MEDICAL) THINGS TECHNOLOGY

3.7M Medical devices in use today connecting to & monitoring various parts of the body

Active implantable medical devices control stimulation &/or precision medicine therapy to treat disease & improve patient quality of life.

Monitors medical conditions specific to patient's disease & other systemic conditions such as heart rate, blood sugar, exercise, etc.

Closed-Loop System
"Smart" software supports device iteration based on data inputs to deliver best patient therapy

One IOMT system solution collecting data from medical devices, medications, & biometrics to modify therapeutic window towards best care option

97% Wi-Fi adoption rates in hospitals
10% Medical devices enabled with Wi-Fi

OPTIMIZED RESULTS FOR:

PATIENTS...

Receive **individually-optimized care** faster, with few doctor office visits, and decreased overall time "thinking" about the disease

HEALTHCARE PROFESSIONALS...

Monitor patient status, disease progression, & device performance. This allows for:

- Enhanced patient support
- Reduced risk
- Feedback on device design improve opportunities

PATIENT FAMILIES...

Can be included in regular communications to help **monitor or reassure assurance of patient wellness**.

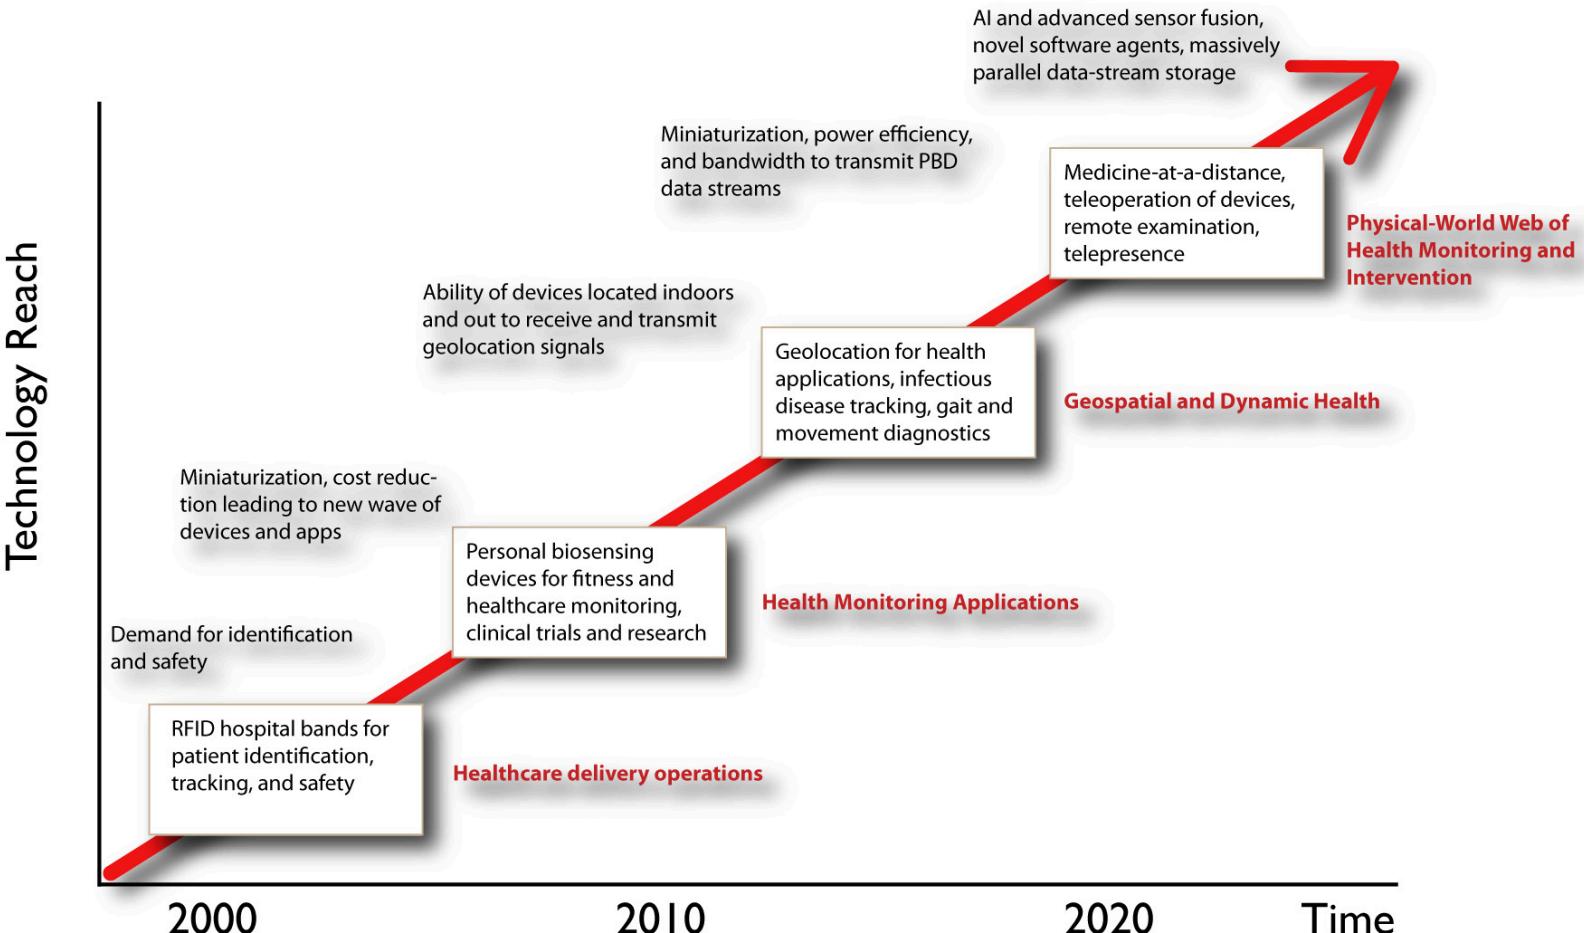

HEALTHCARE SYSTEM...

Automated monitoring & verification of advanced products to **eliminate human error & falsification**

NEXEON

Io(M)T: Tech vs. Time

Roadmap: The Internet of Medical Things.....

WHAT IS DATA SCIENCE?

A dense cloud of text labels related to data science, technology, and business, including: COMPUTING TECHNOLOGY, E-MARKETING, COMPUTER, COMMUNICATION, MULTIMEDIA, NETWORK, PROJECTS, PREDICTIVE, PROGRAM, ANALYTICS, DATA, MINING, SCIENCE, INFORMATION, SOLUTIONS, MATHS, PATTERN, ENGINEERING, PLANNING, MEDIA, STATISTICS, TARGET, DETECTION, SOCIAL MEDIA, SERVICES, BIG DATA, PROMOTION, PROCESSING, CONTENT, CONSUMER, ORGANIZATION, PLANNING, EVENTS, PROGRAMMING, SOFTWARE, WEB MARKETING, DATA, VISION, ENGINEERING, RESEARCH, PROBABILITY, COMPUTING, KDD, WEB DEV, STRATEGY, WORLDWIDE, SERVICE, VISUALIZATION, MOBILE, PRICING, CODING, INFORMATION, DIGITAL, SEGMENTATION, SOCIAL NETWORKS, and NETWORK.

A mash up of disciplines

An umbrella term for techniques used when trying to extract insights and information from the data.

Math and Theory

- Statistics, Linear Algebra, Optimization, Time Series, etc.

Applied Algorithms

- Machine Learning, Data Structures, Parallel Algorithms, etc.

Engineering and Technologies

- Storage and computing platforms, statistical tools ,etc.

Domain Expertise

- Text, Finance, Images, Econometrics etc.

Art

- Visualization, Infographics

Best practices and hacks

- Handle missed values in data, transform and represent data, etc.

Example: Data science in healthcare

Survival analysis

Analyze survival statistics for different patient attributes (like age, gender, blood type) and treatments.

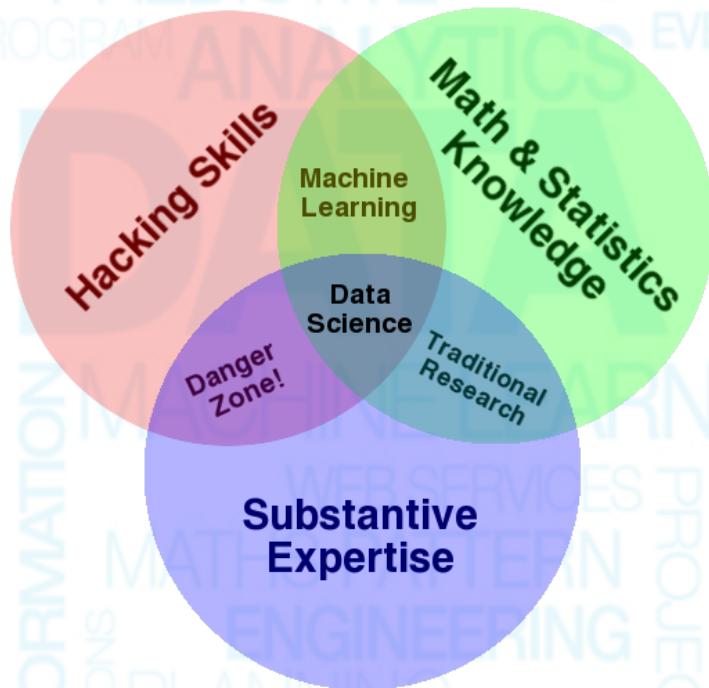

Dosage effectiveness

Study the effectiveness of the dosage from the measured variables based on the medication for a disease.

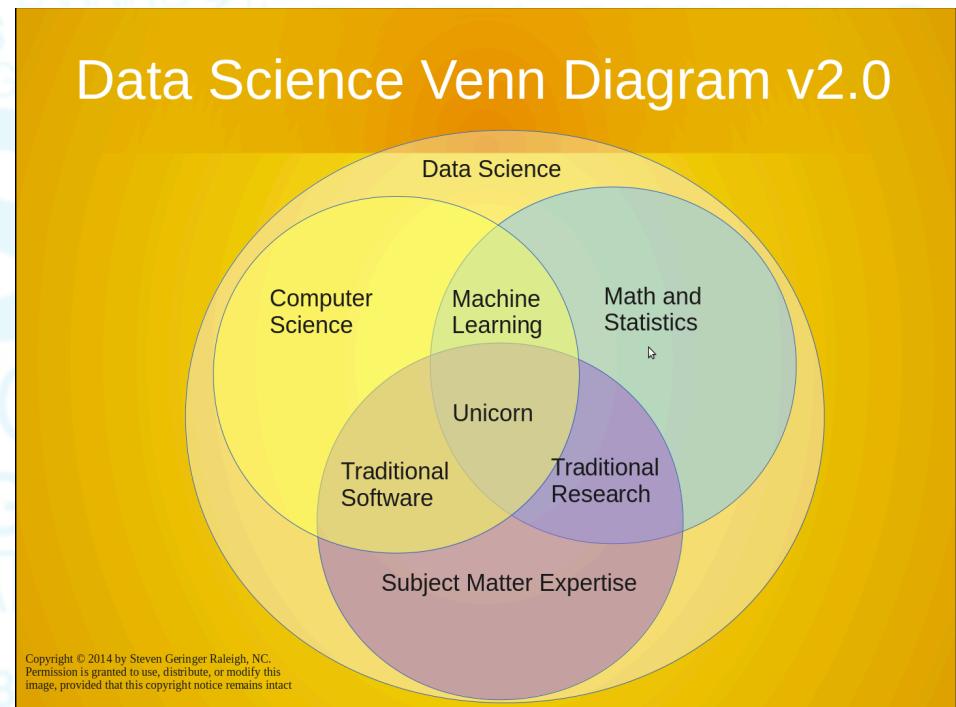

Readmission risk

Predict the risk of readmission based on patient attributes, medical history, diagnosis and treatment.

Data scientist: Amalgamation of skills

MODERN DATA SCIENTIST

Data Scientist, the sexiest job of the 21th century, requires a mixture of multidisciplinary skills ranging from an intersection of mathematics, statistics, computer science, communication and business. Finding a data scientist is hard. Finding people who understand who a data scientist is, is equally hard. So here is a little cheat sheet on who the modern data scientist really is.

MATH & STATISTICS

- ★ Machine learning
- ★ Statistical modeling
- ★ Experiment design
- ★ Bayesian inference
- ★ Supervised learning: decision trees, random forests, logistic regression
- ★ Unsupervised learning: clustering, dimensionality reduction
- ★ Optimization: gradient descent and variants

PROGRAMMING & DATABASE

- ★ Computer science fundamentals
- ★ Scripting language e.g. Python
- ★ Statistical computing packages, e.g., R
- ★ Databases: SQL and NoSQL
- ★ Relational algebra
- ★ Parallel databases and parallel query processing
- ★ MapReduce concepts
- ★ Hadoop and Hive/Pig
- ★ Custom reducers
- ★ Experience with xaaS like AWS

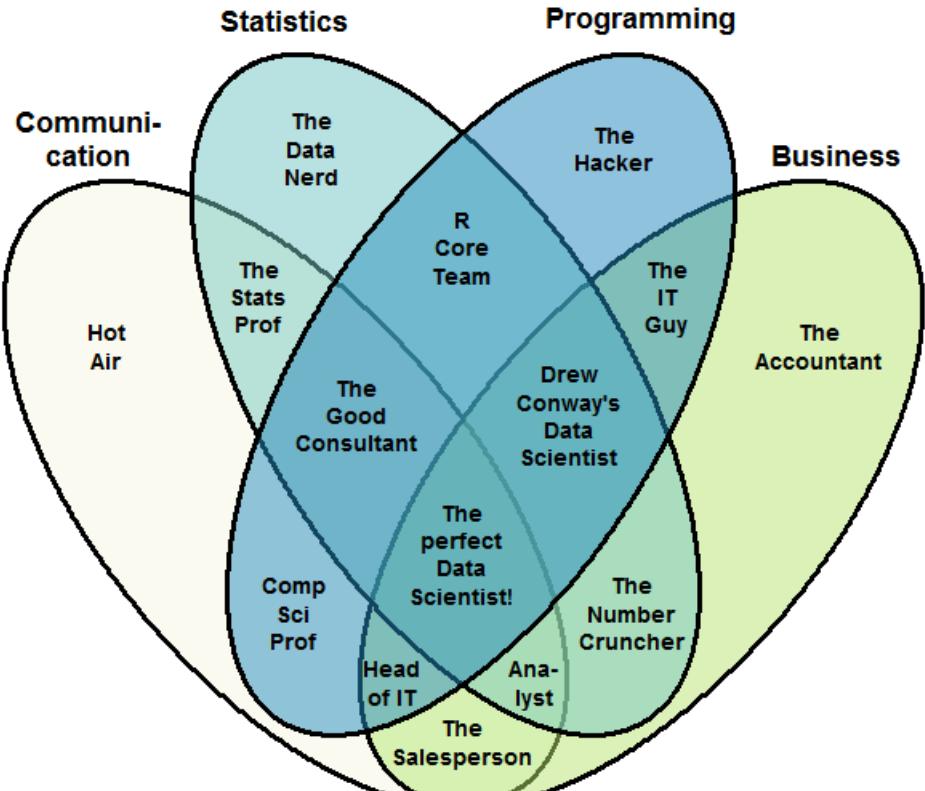

DOMAIN KNOWLEDGE & SOFT SKILLS

- ★ Passionate about the business
- ★ Curious about data
- ★ Influence without authority
- ★ Hacker mindset
- ★ Problem solver
- ★ Strategic, proactive, creative, innovative and collaborative

COMMUNICATION & VISUALIZATION

- ★ Able to engage with senior management
- ★ Story telling skills
- ★ Translate data-driven insights into decisions and actions
- ★ Visual art design
- ★ R packages like ggplot or lattice
- ★ Knowledge of any of visualization tools e.g. Flare, D3.js, Tableau

The Data Scientist Venn Diagram

Data analysts vs. Data scientists

	ANALYSTS	DATA SCIENTISTS
Types of data	Structured and semistructured, mostly numeric data	All types, including unstructured, numeric and nonnumeric data (such as images, sound, text)
Preferred tools	Statistical and modeling tools, usually contained in a data repository	Mathematical languages (such as R and Python), machine learning, natural language processing and open-source tools that access and manipulate data on multiple servers (such as Hadoop)
Nature of work	Report, predict, prescribe and optimize	Explore, discover, investigate and visualize
Typical educational background	Operations research, statistics, applied mathematics, predictive analytics	Computer science, data science, symbolic systems, cognitive science
Mind-set	Percentage who say they: <ul style="list-style-type: none">•are entrepreneurial: 69%•explore new ideas: 58%•gain insights outside of formal projects: 54%	Percentage who say they: <ul style="list-style-type: none">•are entrepreneurial: 96%•explore new ideas: 85%•gain insights outside of formal projects: 89%

Roles and paychecks

DATA ENGINEER
"SOFTWARE ENGINEERS BY TRADE"

Role
Develops, constructs, tests and maintains architectures (such as databases and large-scale processing systems)

Mindset
All-purpose everyman

HIRED BY
  

Languages
SQL, Hive, Pig, R, Matlab, SAS, SPSS, Python, Java, Ruby, C++, Perl

Skills & Talents

- ✓ Database systems (SQL & NO SQL based)
- ✓ Data modeling & ETL tools
- ✓ Data APIs
- ✓ Data warehousing solutions

DATABASE ADMINISTRATOR
"DATABASE CARETAKER"

Role
Ensures that the database is available to all relevant users, is performing properly and is being kept safe

Mindset
Master of Disaster Prevention

HIRED BY
  

Languages
SQL, Java, Ruby on Rails, XML, C#, Python

Skills & Talents

- ✓ Backup & recovery
- ✓ Data modeling and design
- ✓ Distributed Computing (Hadoop)
- ✓ Database systems (SQL and NO SQL based)
- ✓ Data security
- ✓ ERP & business knowledge

BUSINESS ANALYST
"CHANGE AGENT"

Role
Improves business processes as intermediary between business and IT

Mindset
Resilient project juggler

HIRED BY
  

Languages
SQL

Skills & Talents

- ✓ Basic tools (e.g. MS Office)
- ✓ Data visualization tools (e.g. Tableau)
- ✓ Conscious listening and storytelling
- ✓ Business Intelligence understanding
- ✓ Data modeling

DATA SCIENTIST
"AS RARE AS UNICORNS"

Role
Cleans, massages and organizes (big) data

Mindset
Curious data wizard

HIRED BY
  

Languages
R, SAS, Python, Matlab, SQL, Hive, Pig, Spark

Skills & Talents

- ✓ Distributed computing
- ✓ Predictive modeling
- ✓ Story-telling and visualizing
- ✓ Math, Stats, Machine Learning

ABOUT THIS COURSE

More practice than theory

A very basic course (introductory but not elementary)

Designed with biology and medical majors in mind.

Theory to bare minimum (only in the context of programming).

Focus on practical aspects (means programming)

Adapting to advancement in technologies (Rstudio etc.)

Emphasis on communication, reproducibility and version control (Rmarkdown, Git etc.)

Working with databases

Focus on biomedical and population health data sets

Language of choice: R

AVERAGE SALARY FOR High Paying Skills and Experience

SKILL	2013	YR/YR CHANGE
R	\$ 115,531	n/a
NoSQL	\$ 114,796	1.6%
MapReduce	\$ 114,396	n/a
PMBok	\$ 112,382	1.3%
Cassandra	\$ 112,382	n/a
Omnigraffle	\$ 111,039	0.3%
Pig	\$ 109,561	n/a
SOA (Service Oriented Architecture)	\$ 108,997	-0.5%
Hadoop	\$ 108,669	-5.6%
Mongo DB	\$ 107,825	-0.4%

What you are encouraged to know (not essential)

Data is usually represented as a matrix

A little linear algebra will go a long way (you may want to attend my linear algebra lecture on Sept. 27)

In data science, most problems are vague

Probability, statistics & machine learning are very important

Fundamental concepts in algorithms and data structures

Big data requires non-trivial data structures and algorithms (you may want to attend my algorithms lecture on Sept. 25)

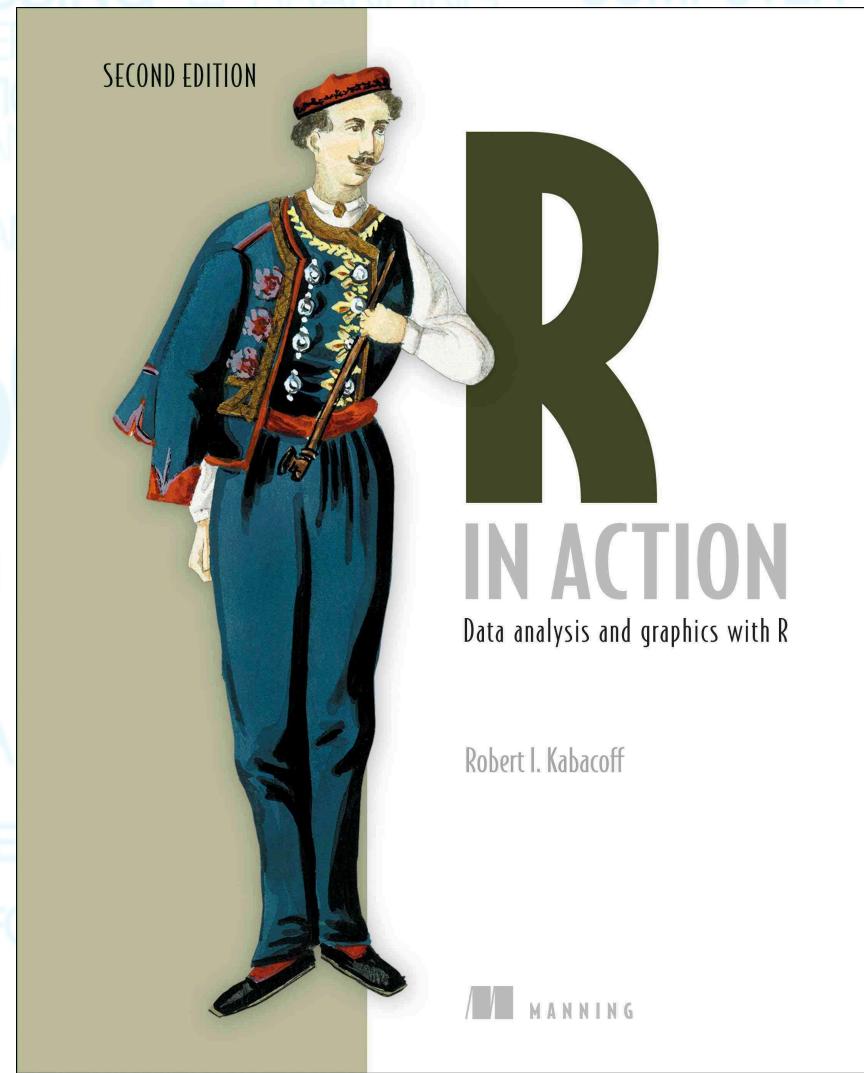

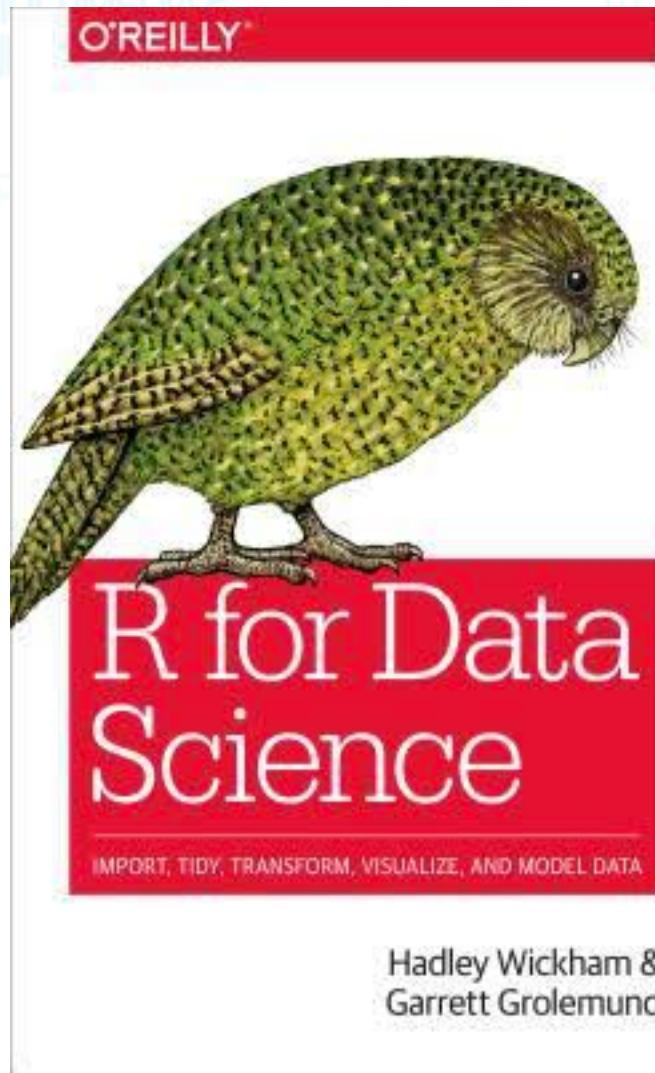

High-performance computing

We have a very good facility here for HPC

Genomics/Epigentetics

Io(M)T will integrate genomics/epigenetics as we progress
